-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1761

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-10, drawn to a packaged composite confection, classified in class 426, subclass 90.
- II. Claims 11-24, drawn to a method of producing a decorated confection, classified in class 426, subclass 383.

The inventions are distinct, each from the other because:

The product as claimed in Group I can be made by a method other than that recited in Group II. For example, instead of applying the pattern to the packaging sheet, the pattern could be applied directly to the food product.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art, requiring separate searches, as shown by their different classification, restriction for examination purposes as indicated is proper.

Further, if applicant elects Group II, then the following election of species is also required.

This application contains claims directed to the following patentably distinct species of the claimed invention:

Species I, wherein the pattern is applied indirectly through a dispensing device;

Species II, wherein the pattern is applied by direct contact by a printing head.

If applicant elects Group II, then Applicant is also required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic.

Art Unit: 1761

Applicant is advised that a reply to this requirement must include an identification of the species that is elected, consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

To expedite prosecution, it is noted that all of the claims dependent on claim 17 appear to lack antecedent basis. For example, "packaging sleeve" and "fat based composition" do not appear in claim 17. Clarification and/or correction is requested.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
